

Rocky Mountain Health Plans (RMHP) Good Health Formulary

The RMHP family of health plans includes these entities:
Rocky Mountain Health Maintenance Organization
Rocky Mountain HealthCare Options

www.rmhp.org

Revised 10/15/2013 Discard all previous copies of formulary

Beneficiaries must use network pharmacies to access their prescription drug benefit.

What is the Formulary?

A formulary is a list of covered drugs selected by Rocky Mountain Health Plans (RMHP) in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. RMHP will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

Can the Formulary change?

Yes. If we remove drugs from our formulary or add prior authorization or quantity limits or move a drug to a higher cost-sharing tier, we will notify affected Members of the change. If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to Members who take the drug. The enclosed formulary is current as of October 15, 2013. The formulary is constantly being updated. To get updated information about the drugs covered by RMHP, please call Customer Service.

Individual Members and Group Plan Members call: 970-243-7050 or 800-346-4643
Medicaid Members call: 970-244-7860 or 888-282-8801

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category "Cardiovascular Agents". Then look under the category name for your drug.

Alphabetical Listing

The Index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

The formulary provides coverage information about some of the drugs covered by the Health Plan. If you have trouble finding your drug in the list, turn to the Index.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., ALLEGRA) and generic drugs are listed in lower-case italics (e.g., *amoxicillin*).

The information in the Coverage column tells you if the Health Plan has any special requirements for coverage of your drug. See the key below for formulary abbreviations. See the section “Are there restrictions on my coverage?” below for information on obtaining a preauthorization.

What are generic drugs?

A generic drug has the same active-ingredient as the brand name drug. Generic drugs usually cost less than brand name drugs and are approved by the Food and Drug Administration (FDA), which assures that the following conditions are met.

- The generic drug must contain the same active ingredients, be the same strength, and the same dosage form as the brand name counterpart.
- The FDA has given an “A” rating compared to the branded counterpart and thus the generic is determined to be therapeutically bioequivalent.
- When the above two criteria are met, a generic can be substituted with the full expectation that the substituted product will produce the same clinical effect and safety profile as the prescribed product.

What is Generic Substitution?

Some drugs are available as a cost saving generic version. Drugs available as generic will usually be filled at the pharmacy with the generic version rather than brand unless your doctor or you request the brand. Remember your generic copay will be less than your brand copay.

Information for providers: Generic medications are generally included in Tier 1. If a generic medication does not offer financial savings over the brand version, it may be placed in the same tier as the brand. Medications with a generic equivalent are noted in lower case. When a brand-name medication becomes available as a generic, that brand-name product may move to a higher tier. Members may be required to pay more for a prescription when a higher-tier brand-name product is dispensed. The member’s payment is determined by the pharmacy benefit plan. When generic substitution conflicts with state regulations or restrictions; the pharmacist must obtain approval from the prescribing physician or other health care professional to substitute the generic equivalent.

What is Therapeutic Interchange?

Rocky Mountain Health Plans supports, but does not require, the use of therapeutic interchange as a part of a comprehensive approach to quality, cost-effective patient care. Therapeutic interchange is the practice of replacing, with the prescribing physician’s approval, a prescription medication originally prescribed for a patient with a chemically different medication. Medications used in therapeutic interchange programs are expected to produce similar levels of clinical effectiveness and sound medical outcomes, based on available scientific evidence.

The Academy of Managed Care Pharmacy describes therapeutic interchange as programs developed by a team of physicians, pharmacists, and other medical practitioners who are experts in the diagnosis and treatment of disease. The programs are designed to work in conjunction with other tools that health care professionals use to promote quality medical results.

Using therapeutic interchange offers several advantages:

Value to Patients: When therapeutic interchange occurs, physicians and other health care experts have determined that patients will experience similar or improved clinical outcomes with the replacement medications. The replacement medication may be more convenient for the patient to take. For example, a patient is more likely to take medication as prescribed if he or she is moved to a therapeutically equivalent product that only needs to be taken twice a day rather than four times a day. A medication that has a high likelihood to cause side effects may be replaced with one that is less likely to do so. A new medication that offers improved therapeutic outcomes may replace an older remedy. A patient is generally less likely to miss doses, and thereby gets the full clinical benefit of their prescription, if the medication is convenient to use, causes fewer side effects, or provides improved control or relief of their condition.

Affordability: A replacement medication that is therapeutically equivalent might simply cost less. Once two medications are determined to result in the same positive outcomes for the patient, it makes sense for the hospital, health plan, or pharmacy network to use the less expensive alternative. Additionally, this may result in lower out-of-pocket expenses for the patient because of reductions in copayments. In instances where two medications are therapeutically equivalent, AMCP does not support therapeutic interchange programs that result in higher costs for patients and/or plan sponsors.

Therapeutic interchange, however, is not always about lower medication costs. Therapeutic interchange often occurs when overall health care savings can be achieved. Replacing one medication with a more expensive one may result in fewer treatment failures, better patient adherence to the treatment plan, fewer side effects and improved clinical outcomes. Such efficient use of medical resources helps keep medical costs down, improves the patient's access to more affordable health care, and enhances the patient's quality of life.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** RMHP requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from RMHP before you fill your prescriptions. If you don't get approval, the Health Plan may not cover the drug. Drugs that are subject to a prior authorization will have a "PA" symbol next to the drug.
 - Physicians & Pharmacies call 970-248-5031 or 800-641-8921
FAX: 970-248-5034
- **Quantity Limits:** For certain drugs, the Health Plan limits the amount of the drug that the Health Plan will cover. For example, the Health Plan provides 12 doses per prescription for Imitrex tablets. This may be in addition to a standard one month or three month supply. Drugs that are subject to a quantity limit will have a "QL" symbol next to the drug.
 - **Refill Limitations:** Prescriptions may be refilled when 70% or more of the day's supply has been used.
- **Step Therapy:** In some cases, the Health Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B. Drugs that are subject to Step Therapy will have a "ST" symbol next to the drug.
- **Age Limit:** In some cases, drugs are only available to Member in a select age category. Drugs that are subject to an Age Limit will have an "AL" symbol next to the drug.
- **Gender Limit:** Some drugs are only available to Members of a certain gender. Drugs that are available to only a certain gender will have a "GL" symbol next to the drug.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 7.

Formulary Exclusions

RMHP reserves the right to exclude any drug at any time from the RMHP Formulary for health and safety concerns or other reasons as determined by RMHP in its discretion. The following drugs are excluded from the RMHP Formulary:

- Any drug labeled by the FDA, “Caution — limited by federal law to investigational use”.
- Drugs not available, marketed or sold in the United States.
- Drugs obtained from a pharmacy or provider located outside the United States, except drugs obtained in connection with a medical emergency.
- Any drug that is not FDA approved.
- Any drug that is used in connection with a service or supply that is not a benefit (for example, drugs used for dental health are not covered).
- Lost or Stolen Medications: RMHP will not cover prescription refills for lost, stolen or damaged medication.

Additionally, all drugs in the following categories are excluded from coverage under the RMHP Formulary:

Generic Drug Name or Category	Example
Anorexiant/weight loss drugs	
Compounded drugs used for an indication or route of administration not approved by the FDA	topical Neurontin and topical calcium channel blockers
Compounded drugs for which an FDA approved drug is available in the prescribed strength and dosage form	
Compounded hormones not approved by the FDA*	Tri-est, Bi-est
Compounded injectable erectile dysfunction drugs	Trimix, prostaglandins
Compounded prescriptions utilizing powders. [Exceptions: polystyrene sulfonate (Kayexalate), salicylic acid, nystatin, caffeine]	
Cosmetic drugs	Propecia, Renova, Vaniqa, Lustra, Botox Cosmetic
DHEA	
Dental drugs	Monodox, Periostat
Dietary supplements	Hypertensa, Theramine
Nebulized solutions compounded from powder	triamcinolone
Prescription drugs for which an equivalent is available over the counter. See discussion of Over the Counter Drugs below.	Claritin, lac-hydrin

*Estrogen, progesterone or testosterone surgically implanted in pellet form, or progesterone in oil injection are not within these exclusions.

Over The Counter Medications: Over-the-counter drugs, with the exception of insulin, are not covered. For renal dialysis patients: antacids, all multi-vitamins, calcium replacement, Proferrin and Proferrin Forte are covered with prior authorization. OTC smoking cessation drugs are covered for Medicaid with prior authorization, examples include Nicoderm patch and Nicorette gum.

What if my drug is not on the Formulary?

Members: If your drug is not included in this formulary, you should first contact Customer Service and confirm that your drug is not covered. If you learn that RMHP does not cover your drug, you can ask us to make an exception to our coverage rules, restrictions or limits. You may call customer service to request a Formulary Exception review or a Formulary Exception request form is available at <https://www.rmhp.org/members/rx-info/formulary-exceptions-requests-commercial>.

There are several types of exceptions that you can ask us to make.

- You can ask us to cover your drug even if it is not on our formulary.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs; RMHP limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover more.
- You can ask us to provide a higher level of coverage for your drug. If your drug is contained in our highest tier subject to the tiering exceptions process, tier 3; you can ask us to cover it at the cost-sharing amount that applies to drugs in the lowest tier subject to the tiering exceptions process, tier 2 instead. This would lower the amount you must pay for your drug. Please note, if we grant your request to cover a drug that is not on our formulary, you may not ask us to provide a higher level of coverage for the drug. Also, you may not ask us to provide a higher level of coverage for drugs that are in the Specialty tier.

Generally, RMHP will only approve your request for an exception if the alternative drugs included on the plan's formulary, the lower-tiered drug or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

Information for providers:

FORMULARY EXECPTION REQUESTS: To request coverage of an excluded drug, contact the RMHP Pharmacy Help Desk at 970-248-5031 (1-800-640-8921). You will be faxed a Formulary Exception Request Form, please fill this out completely and **fax back to RMHP at 970-248-5034**.

PRIOR AUTHORIZATION: Some drugs require prior authorization before RMHP will cover. You can view the specific PA criteria for all drugs that require prior authorization on our website: <http://www.rmhp.org/providers/prior-authorization/prior-authorization-pharmacy>. You can also call the RMHP Pharmacy Help Desk at 970-248-5031 (1-800-640-8921) and they will fax you a prior authorization form. Please complete this form, attach any relevant medical records, and fax back to the RMHP Pharmacy Help Desk.
